Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

1) Monthly prices are collected and processed three times per annum.
1) Des prix mensuels sont relevés et calculés trois fois par année.
2) Indexes for the current year and previous year are subject to revision.
2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix. bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggragations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits(GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981 l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de L'industrie, 1986 = 100: guide aux utilisateurs, $40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits.Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, ou téléphonez au (613)951-9607.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à a période courante t;
Σ_i	indique la sommation sur tous les éléments i faisan partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

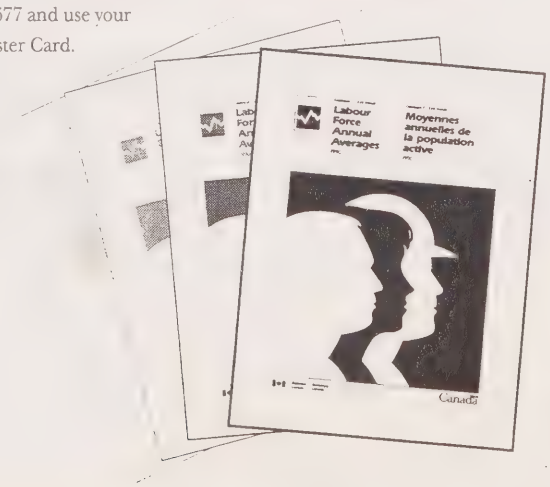
Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précémment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, ou téléphonez au (613)951-9607.

To those of you who need in-depth information about the labour market ...

... Statistics Canada introduces ***Labour Force Annual Averages 1990*** — a brand-new reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force.*

The ***Labour Force Annual Averages 1990*** covers:



- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by province;
- hours worked by industry and occupation, by sex, age and province;
- and more.

Labour Force Annual Averages 1990. Part and parcel of Statistics Canada's customer-driven approach to business information.

Labour Force Annual Averages 1990 (catalogue number 71-220) is available for $39 in Canada, US$47 in the United States and US$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)

For faster service FAX your order to 1-613-951-1584. Or call toll-free 1-800-267-6677 and use your VISA or Master Card.

À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail ...

What happened to the cost of living last month?

The Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- food
- clothing
- housing
- health and personal care
- recreation, reading and education
- tobacco products and alcoholic beverages

Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

Get the facts.

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for $93 in Canada, US$112 in the United States and US$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Qu'en était-il du coût de la vie le mois dernier ?

L'indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

Abonnez-vous !

L'indice des prix à la consommation (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 $ au Canada, 112 $ US aux États-Unis et 130 $ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then ***Canadian Social Trends*** is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, ***Canadian Social Trends*** looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, ***Canadian Social Trends*** provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, ***Canadian Social Trends*** also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE ?

Alors ***Tendances sociales canadiennes*** est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, ***Tendances sociales canadiennes*** brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, ***Tendances sociales canadiennes*** dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

Tendances sociales canadiennes présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) remained unchanged at 107.6 in October 1991 from September's level. This follows eight consecutive months of decreases. Of the 21 indexes for major groups of products, five decreased while ten increased and six remained unchanged. Decreases in the indexes for lumber, sawmill and other wood products (-1.2%), paper and paper products (-1.1%) and primary metal products (-0.6%) were offset by price increases for autos, trucks and other transport equipment (0.6%), chemical and chemical products (0.5%) and printing and publishing (1.0%). An additional factor in October was the 0.5% decline of the U.S. dollar versus its Canadian counterpart and its downward effect on prices of exported goods denominated in U.S. currency.

Since October 1990, the IPPI has decreased 2.7%, the lowest annual rate of change registered since the introduction, in 1956, of the complete set of price indexes for manufactured goods; this contrasts with the positive year-to-year rate shown in January 1991 (2.2%). The major contributors to the annual change were indexes for primary metal products (-12.5%), paper and paper products (-12.5%) and petroleum and coal products (-15.1%). The primary metals and the paper and the paper products groups were also the main cause of the change in the year-to-year rate for first stage intermediate goods, which went from -2.5% in January 1991 to -13.9% in October. Of indexes that increased over the year, those which had the biggest impact on the overall change were autos, trucks and other transport equipment (1.4%), tobacco and tobacco products (10.0%) and printing and publishing (3.0%). Despite these increases, the year-to-year rate for finished goods has also declined, from 4.0% in January 1991 to 0.8% in October. This is the lowest year-to-year change for finished goods since October 1988. Excluding petroleum and coal products, the 12-month change was -1.9% in October.

For a thirteenth consecutive month the paper and paper products index fell, by 1.1% in October 1991, due mainly to the effect of a 2.8% drop in pulp prices as well as a 1.2% drop in newsprint and other paper stock prices. Lower prices were experienced on both domestic and export markets. At a level of 97.8, the pulp index was at its lowest point since June 1986. Over the last twelve months, the pulp index has fallen 30.5% and was the major factor behind the 12.5% decline in the paper and paper products index, while the newsprint and other paper stock group and the paper products group index were down 6.2% and 2.1% respectively.

The primary metal products index edged down 0.6% in October, marking its thirteenth consecutive decline, to reach 101.8, its lowest level since April 1987. The monthly change was mainly due to price decreases of 5.8% for nickel products and 3.6% for aluminum products. An increase in prices of 0.8% for iron and steel products helped moderate the overall decline. During the past twelve months, the primary metal products index has fallen 12.5%, with declines ranging from 29.2% for aluminum products to 15.5% for copper and copper alloy products and only 1.0% for iron and steel products. No component registered an increase.

The lumber, sawmill and other wood products index showed a decrease of 1.2% in October due primarily to lower prices for softwood lumber and ties (-2.0%). Over the last twelve months, decreases for sash, door and other millwork products (-3.4%) were mainly responsible for the 0.6% drop in the lumber, sawmill and other wood products index.

The index for chemical and chemical products increased by 0.5% in October due mainly to a gain of 2.6% for organic industrial chemicals. Over the last twelve months, the chemical and chemical products index has declined by 1.5% as a result of a decrease in prices for synthetic resins (-13.8%).

The autos, trucks and other transportation equipment index rose 0.6% in October. This month included an estimated 2.2% price increase for Canadian-made automobiles, intended to reflect the effect of the introduction of the 1992 models. The 0.5% drop in the U.S./Canada exchange rate, which affects export prices, moderated the estimated increase. During the last twelve months, the autos, trucks and other transportation equipment index has risen 1.4%.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986 = 100) se situait à 107.6 en octobre 1991, inchangé par rapport au niveau de septembre 1991. Ceci suit huit baisses mensuelles consécutives de l'IPPI. Des 21 principaux groupes des produits, cinq ont diminué alors que dix ont augmenté et six sont demeurés inchangés. Les baisses enregistrés dans les indices des sciages, produits de scierie et divers (-1.2%), du papier et produits connexes (-1.1%) et des produits métalliques primaires (-0.6%) ont été contrebalancées par des augmentations dans les prix des autos, camions et autre matériel de transport (0.6%), des produits chimiques (0.5%) et de l'impression et l'édition (1.0%). Un facteur additionnel a été la baisse de 0.5% du dollar américain face au dollar canadien en octobre, et son effet à la baisse sur les prix à l'exportation, cotés en dollar américain.

Depuis octobre 1990, l'IPPI a diminué de 2.7%, le plus bas taux de variation annuel enregistré depuis l'introduction, en 1956, de l'ensemble complet des indices de prix pour les produits manufacturés; un contraste avec le taux positif affiché en janvier 1991 (2.2%). Les principaux indices derrière la baisse annuelle ont été les produits métalliques primaires (-12.5%), le papier et produits connexes (-12.5%) et les produits du pétrole et du charbon (-15.1%). Les produits métalliques primaires et ceux du papier et produits connexes ont été aussi les principaux facteurs du changement important dans le taux annuel de variation pour les produits semi-finis de première transformation, qui est passé de -2.5% en janvier 1991 à -13.9% en octobre. Parmi les indices qui ont enregistré une augmentation annuelle, ceux qui ont eu un effet modérateur sur la variation annuelle ont été les autos, camions et autre matériel de transport (1.4%), le tabac et produits du tabac (10.0%) et l'impression et l'édition (3.0%). Malgré ces hausses, le taux de changement annuel pour les produits finis a aussi diminué, passant de 4.0% en janvier 1991 à 0.8% en octobre. Ceci est le plus bas de variation annuel enregistré pour les produits finis depuis octobre 1988. Sans les produits du pétrole et du charbon, la variation sur douze mois a été de -1.9% en octobre.

Pour un treizième mois consécutif, l'indice des prix du papier et produits connexes a diminué de 1.1% en octobre, en raison principalement de l'effet de la baisse de 2.8% affichée par les prix des pâtes de bois ainsi que celle de 1.2% affichée par les prix du papier journal et autres pâtes travaillées. Des prix plus bas ont été affichés tant sur le marché domestique que sur celui à l'exportation. Avec un niveau de 97.8 en octobre, l'indice des pâtes de bois a atteint son plus bas point depuis juin 1986. Au cours des douze derniers mois, l'indice des pâtes de bois a chuté de 30.5% et a été le principal facteur derrière le recul de 12.5% de l'indice du papier et produits connexes, pendant que l'indice du groupe du papier journal et autres pâtes travaillées et celui des produits du papier étaient en baisse respectivement de 6.2% et 2.1%.

Avec une baisse de 0.6% en octobre 1991, l'indice des produits métalliques primaires a enregistré une treizième baisse mensuelle consécutive, et à 101.8 a atteint son plus bas niveau depuis avril 1987. La baisse mensuelle a été causé principalement par les diminutions de prix de 5.8% pour les produits du nickel et de 3.6% pour les produits d'aluminium. Avec une hausse de 0.8%, les produits du fer et de l'acier ont modéré la baisse globale. Au cours des douze derniers mois, l'indice des produits métalliques primaires a chuté de 12.5%, avec des baisses allant de 29.2% pour les produits d'aluminium à 15.5% pour ceux du cuivre et d'alliage de cuivre et à seulement 1.0% pour les produits du fer et de l'acier. Aucune composante n'a affiché d'augmentation.

L'indice des sciages, produits de scierie et divers a connu une chute de 1.2% en octobre 1991, en raison principalement de l'effet de la baisse de 2.0% affiché par les prix du bois de construction, de résineux. Au cours des douze derniers mois, les baisses pour les châssis, porte et autres produits ouvrés en bois (-3.4%) ont été les principaux facteurs du changement dans le taux annuel de variation pour l'indice des sciages, produits de scierie et divers (-0.6%).

L'indice des produits chimiques a affiché une hausse de 0.5% en octobre, en raison principalement d'une augmentation de 2.6% dans les prix des produits chimiques industriels, organiques. Au cours des douze derniers mois, l'indice des produits chimiques a diminué de 1.5%, principalement à cause des baisses dans les prix des résines synthétiques (-13.8%).

L'indice des autos, camions et autre matériel de transport a augmenté de 0.6% en octobre. Les données d'octobre comprennent une hausse estimative de 2.2% pour les prix des automobiles fabriquées au Canada, afin de tenir compte de l'introduction des modèles 1992. La baisse de 0.5% du taux de change É.U./Canada, qui a un impact sur les prix à l'exportation, a eu un effet modérateur sur cette estimation. Au cours des douze derniers mois, l'indice des autos, camions et autre matériel de transport a augmenté de 1.4%.

Highlights

Raw Materials Price Index

Preliminary estimates for the Raw Materials Price Index (RMPI,1986 = 100) showed no change in October 1991 as the index remained at 102.6. The mineral fuels index rose by 1.4% while the prices of non-ferrous metals, vegetable products and wood went down 2.2%, 1.6% and 0.9% respectively. The RMPI excluding mineral fuels fell 0.6% between September and October 1991.

In October 1991, the RMPI was down 17.7% from October 1990. The decline was due to drops in six of seven components of the total index. The main changes were a 33.9% drop in mineral fuel prices and a 20.6% decrease in the non-ferrous metals index. Excluding the mineral fuels component, the RMPI was down 6.5% in October 1991 compared to October 1990.

The mineral fuels price index rose by 1.4% in October as a result of higher prices for crude mineral oils (1.5%). The mineral fuels index was down 33.9% from October 1990, due primarily to a 35.4% drop in the prices of crude mineral oils. However, this steep decline reflects the comparison wile abnormally high prices registered late last year during the Persian Gulf War.

The non-ferrous metals index was down 2.2% from the previous month. This decline was mainly due to a 7.5% drop in the prices of aluminum materials and a 10.5% decrease in the prices of concentrates of zinc. However, the fall was moderated by a 2.6% increase in prices of precious metals. Over the past year, the non-ferrous metals index has dropped by 20.6% and has reached 91.9, its lowest level since 1986. The main contributions to this decline came from lower prices for aluminum materials (-38.1%), concentrates of copper (-16.9%), zinc (-32.9%) and lead (-27.2%).

In October, the vegetable products index was down 1.6% from September. This decrease was mainly due to a decline in the prices of raw tobacco (-7.1%), cocoa, coffee and tea (-5.8%) and oilseeds (-3.4%). However, the overall fall was moderated by a 4.1% rise in wheat prices. Over the twelve previous months, the vegetable products index fell 5.8% due primarily to drops in the unrefined sugar index (-15.6%), fresh potatoes (-9.9%) and oilseeds (-8.8%).

The wood price index fell 0.9% from September to October 1991. The prices of logs and bolts dropped 1.1%, while prices of pulpwood dipped by 0.4%. However, the wood price index was up 3.3% over the same period last year. This index is the only major component of the RMPI to show an increase between October 1990 and 1991.

The animal and animal products index was up 0.4% in October due to increases in the prices of unprocessed milk (1.7%) and chickens (2.4%). However, these increases have been mostly offset by the seventh consecutive monthly decline (-2.5% this month) in the prices of cattle for slaughter. The animal and animal products index was down 5.1% from the same period last year, due primarily to a 18.9% drop in hog prices and a 13.2% decrease in the prices of cattle for slaughter. However, the prices of fish were up 17.8% in October 1991 compared to the same period last year.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) n'a pas changé en octobre et est demeuré à 102.6. Malgré cela, l'indice des prix des combustibles minéraux a augmenté de 1.4% alors que ceux des métaux non ferreux, des produits végétaux et du bois ont fléchi de 2.2%, 1.6% et 0.9% respectivement. L'IPMB sans la composante des combustibles minéraux a diminué de 0.6% entre septembre et octobre 1991.

En octobre 1991, l'IPMB était inférieur de 17.7% par rapport à la même période l'an dernier. Cette diminution a été le résultat de baisses dans six des sept composantes de l'indice total. Parmi celles-ci notons la chute de 33.9% des prix des combustibles minéraux et celle de 20.6% de l'indice des métaux non ferreux. L'IPMB sans la composante des combustibles minéraux a diminué de 6.5% entre octobre 1990 et octobre 1991.

L'indice des prix des combustibles minéraux a augmenté de 1.4% en octobre suite à la hausse de 1.5% des prix des huiles minérales brutes. Par rapport à octobre 1990, l'indice des combustibles minéraux a diminué de 33.9% surtout à cause de la chute de 35.4% des prix des huiles minérales brutes. Cependant, cette baisse annuelle doit être interprétée en tenant compte du fait que le prix des huiles minérales brutes observées à la fin de 1990 étaient anormalement élevé à cause de la guerre dans le Golfe Persique.

L'indice des métaux non ferreux a diminué de 2.2% par rapport au mois précédent. Cette baisse a été surtout causée par la chute de 7.5% des prix des matériaux d'aluminium et par celle de 10.5% pour les concentrés de zinc. Le mouvement à la baisse fut modéré par la hausse de 2.6% des prix des métaux précieux. Au cours de la dernière année, l'indice des métaux non ferreux a diminué de 20.6% et à 91.9 était à son plus bas niveau depuis 1986. Cette baisse fut le résultat de la chute de 38.1% des prix des matériaux d'aluminium, des concentrés de cuivre (-16.9%) de zinc (-32.9%) et de plomb (-27.2%).

L'indice des substances végétales a enregistré en octobre une diminution de 1.6% par rapport à septembre. Cette variation a été surtout causée par les baisses de 7.1% des prix du tabac en feuilles, de 5.8% des prix du cacao, café et thé et de 3.4% pour les oléagineaux. Cependant, la hausse de 4.1% du prix du blé a modéré la baisse globale. Au cours des douze derniers mois, l'indice des substances végétales a diminué de 5.8% en raison principalement des baisses de 15.6% des indices du sucre non raffiné, des pommes de terres fraîches (-9.9%) et des oléagineaux (-8.8%).

L'indice du prix du bois a diminué de 0.9% entre septembre et octobre 1991. Les prix des billes et billots ont baissé de 1.1% et ceux du bois à pâte de 0.4%. Comparé à la même période l'an dernier, l'indice des prix du bois a augmenté de 3.3%. Parmi les principales composantes de l'IPMB total, c'est le seul indice qui soit en hausse par rapport au mois d'octobre 1990.

L'indice des animaux et des substances animales a augmenté de 0.4% en octobre en raison des hausses de 1.7% des prix du lait non transformé et de 2.4% pour les prix des poulets. Cependant ces augmentations ont été presque entièrement neutralisées par la septième baisse mensuelle de suite (-2.5% ce mois-ci) des prix des bovins envoyés à l'abattage. Par rapport à la même période l'an dernier, l'indice des animaux et des substances animales a régressé de 5.1%, principalement à cause des baisses de 18.9% des prix du porc et de 13.2% des prix des bovins envoyés à l'abattage. Par contre, les prix du poisson étaient 17.8% plus élevés en octobre 1991 qu'en octobre l'an dernier.

	Paper & paper products – Papier & produits connexes	105.1	106.3	-1.1	-3.8	-12.5
	Printing & publishing – Impression & édition	126.1	124.9	1.0	0.8	3.0
	Primary metal products – Produits métalliques primaires	101.8	102.4	-0.6	-1.7	-12.5
	Metal fabricated products – Semi-produits métalliques	112.6	112.4	0.2	0.3	0.4
	Machinery & equipment – Machines & matériel	115.4	115.4	0.0	0.0	1.2
	Autos, trucks, other transp. eqp. – Voitures, camions & autres	99.3	98.7	0.6	0.6	1.4
	Elec. & communications prod. – Appareils élect. & de télécom.	110.1	110.0	0.1	0.0	-0.8
	Non metallic mineral products – Produits minéraux non métallique	111.1	110.8	0.3	0.0	-0.4
	Petroleum & coal products – Produits du pétrole & du charbon	92.5	92.5	0.0	0.5	-15.1
	Chemicals, chemical products – Produits chimiques	114.4	113.8	0.5	0.3	-1.5
	Misc. manufactured products – Produits manufacturiers divers	111.7	111.5	0.2	-0.3	2.0
4	**Intermediate goods – Produits semi-finis**	**106.1**	**106.4**	**-0.3**	**-1.3**	**-5.0**
	First stage intermediate goods – Produits semi-finis de première étape	103.8	104.5	-0.7	-2.4	-13.9
	Second stage intermediate goods – Produits semi-finis de deuxième étape	106.8	106.9	-0.1	-1.0	-2.1
	All finished goods – Tous les produits finis	**109.9**	**109.4**	**0.5**	**0.5**	**0.8**
	Finished foods & feeds – Aliments de consommation et alim. pour anim.	115.2	115.0	0.2	0.0	1.5
	Capital equipment – Matériel capitalisé	108.6	108.0	0.6	0.5	1.7
	All other finished goods – Tous autres produits finis	107.8	107.3	0.5	0.7	0.0
	All manufacturing industries(2) – Industries manufacturières(2):					
3	**Gross weighted (80 SIC)(2) – Pondération brute (80 CTI)(2)**	**107.6**	**107.6**	**0.0**	**-0.6**	**-2.7**
6	**Raw materials – Total – Ensemble des matières brutes**	**102.6**	**102.6**	**0.0**	**0.3**	**-17.7**
	Raw materials – Total – Excl. mineral fuels – Ensemble des matières sauf combustibles minéraux	**100.8**	**101.4**	**-0.6**	**-2.9**	**-6.5**
	Vegetable products – Substances végétales	88.1	89.5	-1.6	-0.5	-5.8
	Animal & animal products – Animaux & substances animales	101.4	101.0	0.4	-4.2	-5.1
	Wood – Bois	121.6	122.7	-0.9	-2.5	3.3
	Ferrous material – Matières ferreuses	89.0	89.1	-0.1	1.1	-4.8
	Non ferrous metals – Métaux non ferreux	91.9	94.0	-2.2	-3.4	-20.6
	Non metallic minerals – Minéraux non métalliques	101.1	101.1	0.0	-2.7	-2.4
	Mineral fuels – Combustibles minéraux	106.5	105.0	1.4	7.5	-33.9

(1) Revised.
(1) Révisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations des produits

1986 = 100

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesure les variations des prix des principaux produits vendus par le fabricants canadiens. Les indices élémentaires sont calculé pour 1314 groupes principaux des produits (GPP) tels qu définis dans les tableaux d'entrées-sorties de 1986. Les poic servant à agréger les indices des produits proviennent de matrice des sorties ou de "production" des tableau d'entrées-sorties. Cette matrice présente un ensemble intégr de valeurs pour les produits à l'intérieur de l'ensemble de industries manufacturières.

Les produits faisant directement l'objet d'un sondage so basés sur des procédures d'échantillonage formelles, et un cote de qualité est présentée pour les produits et le agrégats de produits. Ces indices sont calculés à partir de prix déclarés pour le 15 du mois, ou le jour ouvrab précédent le plus proche pour des transactions comparables

Un certain nombre d'indices sont publiés environ cir semaines après la fin du mois de référence dans le Quotidie (nº 11-001F au catalogue), selon un calendrier de publicatio préalablement établi. Simultanément, toutes les séries so disponibles dans CANSIM ou sur demande. La publication 62-011 au catalogue, *Indice des prix de l'industrie,* para quatre semaines environ après le communiqué dans *Quotidien.* Chaque série est identifiée par un numéro D CANSIM et par un identificateur de produits (GPP) ou branche d'activité (CTI). Les chiffres publiés pour les derniers mois sont sujets à révision. Ainsi, lorsque l'indice juillet est publié, l'indice pour le mois de janvier précéde devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois aupr d'environ 3,500 producteurs pour des biens vendus qui so évalués à la limite de l'établissement, de sorte que les tax prélevées à ce point et le coût du transport fourni par transporteurs communs au-delà de ce point sont exclus. L prix sont relevés pour des transactions à un niveau tr détaillé, qui permet d'identifier le bien et les conditions vente. De tels relevés sont institués pour les produ importants. Des élargissements sont apportés à échantillons pour lesquels le mouvement des prix a u dimension régionale, ou pour lesquels il existe un import marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire fais directement l'objet d'un sondage se fait habituellement une méthode d'échantillonnage probabilistes, selon laqu les producteurs importants sont des réponda "obligatoires", tandis que l'on procède à une sélect aléatoire des producteurs moins importants. Ces échantillo

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix. bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

Σ_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggragations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de L'industrie, 1986 = 100: guide aux utilisateurs, $40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix son pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondération équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

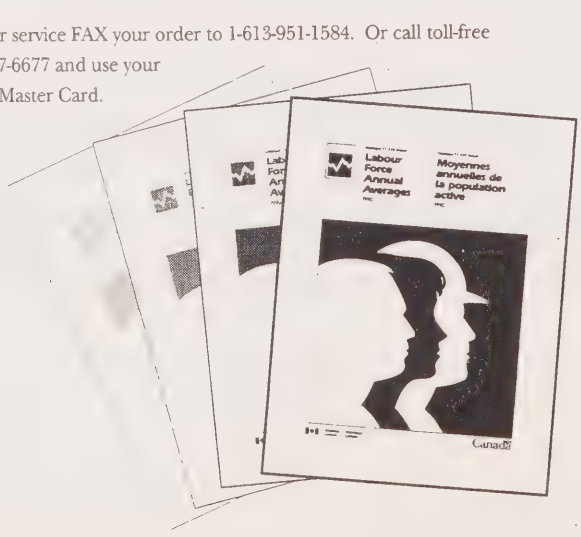
Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précémment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607, télécopieur (613)951-2848.

To those of you who need in-depth information about the labour market ...

... Statistics Canada introduces ***Labour Force Annual Averages 1990*** — a brand-new reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force.*

The ***Labour Force Annual Averages 1990*** covers:



- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by province;
- hours worked by industry and occupation, by sex, age and province;
- and more.

Labour Force Annual Averages 1990. Part and parcel of Statistics Canada's customer-driven approach to business information.

Labour Force Annual Averages 1990 (catalogue number 71-220) is available for $39 in Canada, US$47 in the United States and US$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)

For faster service FAX your order to 1-613-951-1584. Or call toll-free 1-800-267-6677 and use your VISA or Master Card.

À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail ...

... Statistique Canada présente ***Moyennes annuelles de la popul active 1990*** — un document de référence tout nouveau, créé spécialement à votre intention. Vous y trouverez des donnée détaillées, des sommaires et des graphiques faciles à consult des ventilations géographiques plus détaillées qu'auparavan davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de *La population active.*

Moyennes annuelles de la population active 1990 porte sur :

- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;
- l'emploi à plein temps et à temps partiel, ventilé par sect d'activité et province;
- les professions dans les régions métropolitaines et les rég économiques;
- les secteurs d'activité dans les régions métropolitaines et régions économiques;
- la participation au marché du travail et les obligations familiales selon la province;
- les heures travaillées, ventilées par secteur d'activité et profession, par sexe, âge et province;
- et bien d'autres.

Moyennes annuelles de la population active 1990, est un pivot d l'approche de Statistique Canada qui vise à satisfaire les bes de ses clients en matière d'information.

Moyennes annuelles de la population active 1990 (numéro 71-220 au catalogue 39 $ au Canada, 47 $ US aux États-Unis et 55 $ US dans les autres pays.

Pour commander, prière d'écrire à l'adresse suivante : Vente des publicati Statistique Canada, Ottawa (Ontario) K1A 0T6, ou communiquer avec le C régional de consultation de Statistique Canada le plus près (liste des centr incluse dans la présente publication).

PICK A TOPIC... ANY TOPIC

Now a redesigned **Statistics Canada Catalogue** will simplify your search for the most up-to-date or historic facts. An expanded and improved keyword index, cross-referencing, increased subject detail and listings by geographical area provide easy access to hundreds of Statistics Canada products and services.

Know the topic but not the "official title"? No matter how wide or narrow the topic – or how little you know about it – you'll appreciate how quickly the cross-referencing leads you to the right source.

You'll find sources of key statistics like consumer price indexes, import/export figures, or population characteristics down to the village level. From the most popular topics of the day like employment, income, trade and education to more detailed research studies like mineral products shipped from Canadian ports or Caribbean immigrants in urban areas... you'll find it all.

This expanded edition of the **Statistics Canada Catalogue** includes descriptions of our full range of services – from publications and maps to microdata files and diskettes. And, many of our electronic product listings include the name and phone number of a contact within Statistics Canada giving you a direct line to more detailed information.

As always, you'll find sections on how to get more help... on-line search techniques in libraries... discount and order information... and the locations of our Reference Centres. You'll especially appreciate that this year's **Catalogue** is bound in a durable, plasticized cover to withstand intensive use.

For ease and completeness in your information search get the **Statistics Canada Catalogue** (cat. # 11-204E) for $13.95 in Canada, US$17 in the U.S. and US$20 in other countries. To order your copy write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or you can FAX your order to (613) 951-1584. For faster service using VISA or MasterCard, call toll-free:

1-800-267-6677.

CHOISISSEZ UN SUJET... N'IMPORTE LEQUEL

Dorénavant le **Catalogue de Statistique Canada** amélioré simplifiera vos recherches de données récentes ou historiques. Son index revu et augmenté comprend des renvois, des sujets plus détaillés et des références géographiques vous permettant d'accéder rapidement à des centaines de produits et de services de Statistique Canada.

☐ Vous connaissez le sujet sans connaître le terme technique ? Peu importe si le sujet est général ou spécifique, vous apprécierez l'accès rapide que vous procure les renvois.

☐ Vous repérerez facilement les sources de statistiques essentielles comme l'indice des prix à la consommation, les importations – exportations ou encore, les caractéristiques de la population jusqu'à l'échelle des villages. Des sujets populaires du jour tels l'emploi, le revenu, le commerce et l'éducation jusqu'aux études plus spécifiques comme les produits minéraux expédiés à partir des ports canadiens ou les immigrants antillais dans les régions urbaines, vous trouverez tout !

☐ L'édition augmentée du **Catalogue de Statistique Canada** contient bien plus encore. Elle présente en détail notre gamme complète de services, depuis les publications et les cartes jusqu'aux disquettes et fichiers de microdonnées. Plusieurs descriptions de nos produits informatiques incluent le numéro de la personne-ressource à Statistique Canada. Vous obtenez donc une voie plus directe avec le service de votre choix.

☐ Comme toujours, le catalogue contient des sections concernant la façon d'obtenir de l'assistance, les recherches bibliographiques automatisées, les réductions offertes, le guide de commande et l'adresse de nos centres régionaux de consultation. Par ailleurs, vous serez heureux d'apprendre que, cette année, la couverture du catalogue est plastifiée pour résister à un usage fréquent.

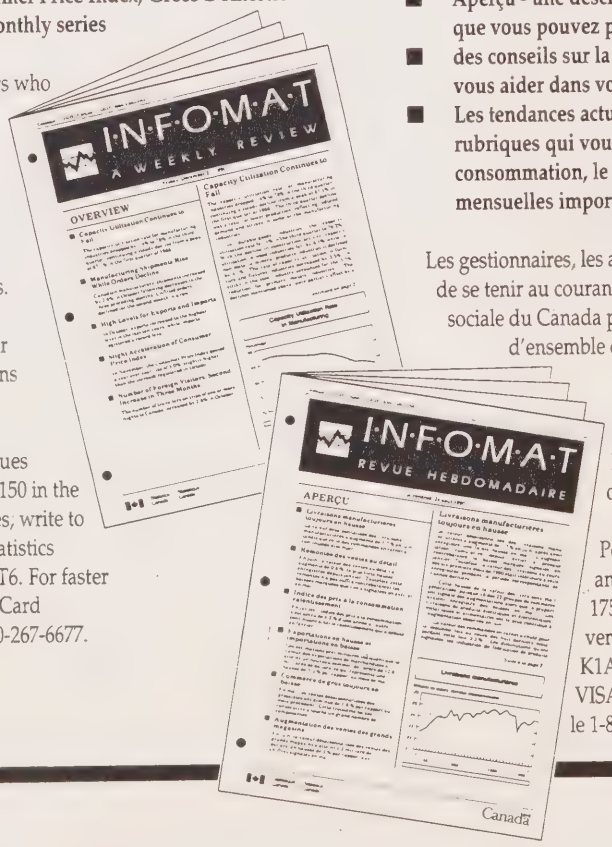
☐ Pour obtenir rapidement la source d'information la plus complète qui soit concernant nos produits, procurez-vous le **Catalogue de Statistique Canada** (nº 11-204F au catalogue) au prix de 13,95 $ au Canada, 17 $ US aux États-Unis et 20 $ US dans les autres pays. Pour commander votre exemplaire, écrivez à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6, télécopiez votre commande au 1-613-951-1584 ou utilisez votre carte VISA ou MasterCard et composez le numéro sans frais :

1-800-267-6677.

I·N·F·O·M·A·T

Don't start your week without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.



In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for $125 in Canada, US$150 in the U.S. and US$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A OT6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissement ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 $ au Canada, 150 $ US aux États-Unis et 175 $ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) edged down to 107.5 in November 1991 from October's level of 107.6. Of the 21 indexes for major groups of products, eight decreased while seven increased and six remained unchanged. Decreases in the indexes for paper and paper products (-0.3%) and chemical and chemical products (-0.8%) were partially offset by price increases for lumber, sawmill and other wood products (1.1%).

Since November 1990, the IPPI has decreased 3.1%, the lowest annual rate of change registered since the introduction, in 1956, of the complete set of price indexes for manufactured goods; this contrasts with the positive year-to-year rate shown in January 1991 (2.2%). The major contributors to the annual change were indexes for primary metal products (-10.3%), paper and paper products (-12.6%) and petroleum and coal products (-19.8%). The primary metals and the paper and paper products groups were also the main cause of the change in the year-to-year rate for first stage intermediate goods, which went from -2.5% in January 1991 to -13.6% in November. Of indexes that increased over the year, those which had the biggest impact on the overall change were autos, trucks and other transport equipment (1.0%), tobacco and tobacco products (10.2%) and printing and publishing (3.1%). Despite these increases, the year-to-year rate for finished goods has also declined, from 4.0% in January 1991 to 0.1% in November. This is the lowest year-to-year change for finished goods since July 1988. Excluding petroleum and coal products, the 12-month change was -1.9% in November.

The index for chemical and chemical products decreased by 0.8% in November due mainly to a drop of 4.8% for organic industrial chemicals. Over the last twelve months, the chemical and chemical products index has declined by 3.9% mainly as a result of a decrease in prices for synthetic resins (-14.3%), more specifically polyethylene resins (-23.4%) and organic industrial chemicals (-15.2%).

For a fourteenth consecutive month the paper and paper products index fell, by 0.3% in November 1991, due mainly to the effect of a 0.5% drop in pulp prices as well as a 0.5% drop in newsprint and paper. Lower prices were experienced on both domestic and export markets. At a level of 97.1, the pulp index was at its lowest point since June 1986. Over the last twelve months, the pulp index has fallen 32.1% and was the major factor behind the 12.6% decline in the paper and paper products index, while the newsprint and other paper stock group and the paper products group index were down 7.0% and 2.5% respectively.

Following thirteen consecutive monthly declines, the primary metal products index remained unchanged in November at 101.7, its lowest level since April 1987. A decrease in the aluminum products index (-2.1%) was offset by an increase in the other non-ferrous metal products index (2.7%). During the past twelve months, the primary metal products index has fallen 10.3%, with declines ranging from 27.1% for aluminum products to 11.8% for copper and copper alloy products and 1.0% for iron and steel products. No component registered an increase.

The lumber, sawmill and other wood products index showed an increase of 1.1% in November due primarily to higher prices for softwood lumber and ties (1.9%) as well as for plywood, softwood excluding douglas fir (9.5%). Over the last twelve months, increases for softwood lumber and ties products (3.5%) were mainly responsible for the 0.8% increase in the lumber, sawmill and other wood products index.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986 = 100) se situait à 107.5 en novembre 1991, en baisse de 0.1% par rapport au niveau de 107.6 pour octobre 1991. Des 21 principaux groupes des produits, huit ont diminué alors que sept ont augmenté et six sont demeurés inchangés. Les baisses enregistrées dans les indices du papier et produits connexes (-0.3%) et des produits chimiques (-0.8%) ont été partiellement contrebalancées par des augmentations dans les prix des sciages, produits de scierie et divers (1.1%).

Depuis novembre 1990, l'IPPI a diminué de 3.1%, le plus bas taux de variation annuel enregistré depuis l'introduction, en 1956, de l'ensemble complet des indices de prix pour les produits manufacturés; un contraste avec le taux positif affiché en janvier 1991 (2.2%). Les principaux indices derrière la baisse annuelle ont été les produits métalliques primaires (-10.3%), le papier et produits connexes (-12.6%) et les produits du pétrole et du charbon (-19.8%). Les produits métalliques primaires et ceux du papier et produits connexes ont été aussi les principaux facteurs du changement important dans le taux annuel de variation pour les produits semi-finis de première transformation, qui est passé de -2.5% en janvier 1991 à -13.6% en novembre. Parmi les indices qui ont enregistré une augmentation annuelle, ceux qui ont eu un effet modérateur sur la variation annuelle ont été les autos, camions et autre matériel de transport (1.0%), le tabac et produits du tabac (10.2%) et l'impression et l'édition (3.1%). Malgré ces hausses, le taux de changement annuel pour les produits finis a aussi diminué, passant de 4.0% en janvier 1991 à 0.1% en novembre. Ceci est le plus bas taux de variation annuel enregistré pour les produits finis depuis juillet 1988. Sans les produits du pétrole et du charbon, la variation sur douze mois a été de -1.9% en novembre.

L'indice des produits chimiques a affiché une baisse de 0.8% en novembre, en raison principalement d'une diminution de 4.8% dans les prix des produits chimiques industriels, organiques. Au cours des douze derniers mois, l'indice des produits chimiques a diminué de 3.9%, principalement à cause des baisses dans les prix des résines synthétiques (-14.3%), plus particulièrement les résines de polyéthylène (-23.4%) et dans les produits chimiques industriels, organiques (-15.2%).

Pour un quatorzième mois consécutif, l'indice des prix du papier et produits connexes a diminué, de 0.3% en novembre, en raison principalement de l'effet de la baisse de 0.5% affichée par les prix des pâtes de bois ainsi que celle de 0.5% affichée par les prix du papier journal. Des prix plus bas ont été affichés tant sur le marché domestique que sur celui à l'exportation. Avec un niveau de 97.1 en novembre, l'indice des pâtes de bois a atteint son plus bas point depuis juin 1986. Au cours des douze derniers mois, l'indice des pâtes de bois a chuté de 32.1% et a été le principal facteur derrière le recul de 12.6% de l'indice du papier et produits connexes, pendant que l'indice du groupe du papier journal et autres pâtes travaillées et celui des produits du papier étaient en baisse respectivement de 7.0% et 2.5%.

Faisant suite à treize mois de diminutions, l'indice des produits métalliques primaires est demeuré inchangé en novembre à 101.7, son plus bas niveau depuis avril 1987. La baisse dans les prix de 2.1% pour les produits d'aluminium a été contrebalancée par une augmentation de prix de 2.7% pour les autres produits de métaux non ferreux. Au cours des douze derniers mois, l'indice des produits métalliques primaires a chuté de 10.3%, avec des baisses allant de 27.1% pour les produits d'aluminium à 11.8% pour ceux du cuivre et d'alliage de cuivre et à 1.0% pour les produits du fer et de l'acier. Aucune composante n'a affiché d'augmentation.

L'indice des sciages, produits de scierie et divers a connu une hausse de 1.1% en novembre 1991, en raison principalement de l'effet de la hausse de 1.9% affiché par les prix du bois de construction, de résineux et celle de 9.5% pour les autres contre-plaqués de bois de résineux. Au cours des douze derniers mois, l'augmentation dans les prix du bois de construction, de résineux (3.5%) a été le principal facteur du changement dans le taux annuel de variation pour l'indice des sciages, produits de scierie et divers (0.8%).

Highlights

Raw Materials Price Index

Preliminary estimates for the Raw Materials Price Index (RMPI, 1986 = 100) showed a 1.0% increase to 103.6 in November. The main contributors to this increase were the mineral fuels index which rose by 3.3% and the non-ferrous metals price index up 1.3%. The 0.8% decline in the animal and animal products index moderated the overall increase. The RMPI excluding mineral fuels fell 0.2% between October and November 1991. This is the ninth consecutive drop in this index this year.

In November 1991, the RMPI was down 17.3% from November 1990. The decline was due to drops in six of seven components of the total index. The main changes were a 33.6% drop in mineral fuel prices and a 16.2% decrease in the non-ferrous metals index. Excluding the mineral fuels component, the RMPI was down 5.5% in November 1991 compared to November 1990.

The mineral fuels price index rose by 3.3% in November as a result of higher prices for crude mineral oils (3.4%). The price of natural gas was also up in November, by 5.2%. The mineral fuels index was down 33.6% from November 1990, due primarily to a 35.0% drop in the prices of crude mineral oils which had peaked in November 1990 at 171.8. In November 1991 this index stood at 111.6.

The non-ferrous metals index was up 1.3% from the previous month. This increase was mainly due to the 1.5% rise in copper concentrate prices and to the 7.0% increase in the zinc concentrates index. Over the past year, the non-ferrous metals index has dropped by 16.2%. The main contributions to this decline came from lower prices for aluminum materials (-33.0%) and concentrates of copper (-11.7%), zinc (-25.1%) and lead (-20.3%).

The animal and animal products index was down 0.8% in November This decline was largely the result of offsetting movements in hog prices which dropped 13.5% and in the prices of cattle for slaughter which rose by 4.7%. The animal and animal products index was down 5.1% from the same period last year, due primarily to a 24.7% drop in hog prices and a 10.1% decrease in the prices of cattle for slaughter. However, the prices of fish were up 15.7% in November 1991 compared to the same period last year.

The wood price index fell 0.6% from October to November 1991. The prices of logs and bolts dropped 0.5%. The prices of softwood pulpwood dipped by 0.9% but prices of hardwood pulpwood went up 1.5%. On a year-to-year basis, the wood price index was up 2.6%. As in October, this index was the only major component of the RMPI to show an increase compared to the same period last year.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) était en hausse de 1.0% à 103.6 en novembre. Cette augmentation a été surtout causée par la hausse de 3.3% de l'indice des prix des combustibles minéraux ainsi que par celle de 1.3% de l'indice des métaux non ferreux. Cependant, la baisse de 0.8% de l'indice des animaux et des substances animales a modéré la hausse globale. Ainsi, l'IPMB sans la composante des combustibles minéraux a enregistré en novembre, sa neuvième baisse de suite (-0.2%).

En novembre 1991, l'IPMB était inférieur de 17.3% par rapport à la même période l'an dernier. Cette diminution a été le résultat de baisses dans six des sept composantes de l'indice total. Parmi celles-ci notons la chute de 33.6% des prix des combustibles minéraux et celle de 16.2% de l'indice des métaux non ferreux. L'IPMB sans la composante des combustibles minéraux a diminué de 5.5% entre novembre 1990 et novembre 1991.

L'indice des prix des combustibles minéraux a augmenté de 3.3% en novembre suite à la hausse de 3.4% des prix des huiles minérales brutes. De plus, le prix du gaz naturel était en hausse de 5.2% ce mois-ci. Par rapport à l'an dernier, l'indice des combustibles minéraux a diminué de 33.6% surtout à cause de la chute de 35.0% à 111.6 des prix des huiles minérales brutes dont l'indice avait atteint le sommet de 171.8 en novembre de l'an dernier.

L'indice des métaux non ferreux a augmenté de 1.3% par rapport au mois précédent. Cette hausse a été surtout causée par l' augmentation de 1.5% des prix des concentrés de cuivre et par celle de 7.0% pour les concentrés de zinc. Au cours de la dernière année, l'indice des métaux non ferreux a diminué de 16.2%. Cette baisse fut le résultat de la chute de 33.0% des prix des matériaux d'aluminium, des concentrés de cuivre (-11.7%) de zinc (-25.1%) et de plomb (-20.3%).

L'indice des animaux et des substances animales a fléchi de 0.8% en novembre. Cette baisse fut le résultat de variations divergentes entre les prix du porc qui ont diminué de 13.5% et ceux des bovins envoyés à l'abattage qui ont augmenté de 4.7%. Par rapport à la même période l'an dernier, l'indice des animaux et des substances animales a régressé de 5.1%, principalement à cause des baisses de 24.7% des prix du porc et de 10.1% des prix des bovins envoyés à l'abattage. Par contre, les prix du poisson étaient 15.7% plus élevés en novembre 1991 qu'en novembre de l'an dernier.

L'indice du prix du bois a diminué de 0.6% entre octobre et novembre 1991. Les prix des billes et billots ont baissé de 0.5% et ceux du bois à pâte de résineux ont fléchit de 0.9% alors que ceux du bois à pâte de feuillu ont augmenté de 1.5%. Comparé à la même période l'an dernier, l'indice des prix du bois a augmenté de 2.6%. Comme en octobre, l'indice des prix du bois est le seul parmi les principales composantes l'IPMB total, qui soit en hausse par rapport à la même période de l'an passé.

(1) Revised.
(1) Révisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agregation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix. bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

Σ_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggragations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de L'industrie, 1986 = 100: guide aux utilisateurs, $40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, here are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
$\sum_i$	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à a période courante t;
$\sum_i$	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précémment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607, télécopieur (613)951-2848.

What happened to the cost of living last month?

The Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- food
- clothing
- housing
- health and personal care
- recreation, reading and education
- tobacco products and alcoholic beverages

Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

Get the facts.

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for $93 in Canada, US$112 in the United States and US$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Qu'en était-il du coût de la vie le mois dernier ?

L'indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

Abonnez-vous !

L'indice des prix à la consommation (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 $ au Canada, 112 $ US aux États-Unis et 130 $ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

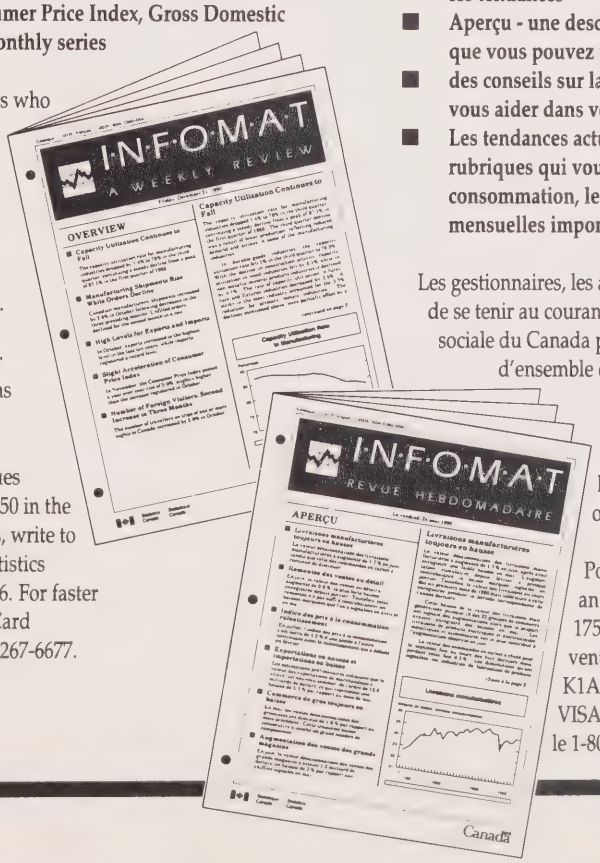
Don't start your week without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.



In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for $125 in Canada, US$150 in the U.S. and US$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A OT6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

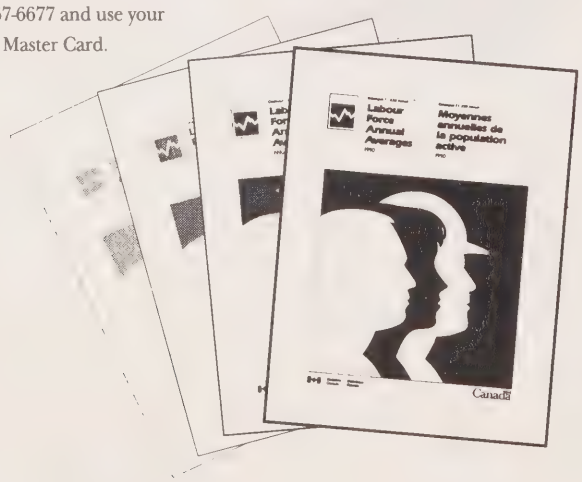
Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 $ au Canada, 150 $ US aux États-Unis et 175 $ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

To those of you who need in-depth information about the labour market ...

... Statistics Canada introduces ***Labour Force Annual Averages 1990*** — a brand-new reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force.*

The ***Labour Force Annual Averages 1990*** covers:



- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by province;
- hours worked by industry and occupation, by sex, age and province;
- and more.

Labour Force Annual Averages 1990. Part and parcel of Statistics Canada's customer-driven approach to business information.

Labour Force Annual Averages 1990 (catalogue number 71-220) is available for $39 in Canada, US$47 in the United States and US$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)

For faster service FAX your order to 1-613-951-1584. Or call toll-free 1-800-267-6677 and use your VISA or Master Card.

À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail ...

... Statistique Canada présente ***Moyennes annuelles de la popul active 1990*** — un document de référence tout nouveau, créé spécialement à votre intention. Vous y trouverez des donnée détaillées, des sommaires et des graphiques faciles à consulte des ventilations géographiques plus détaillées qu'auparavant davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de *La population active.*

Moyennes annuelles de la population active 1990 porte sur :

- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) edged up to 107.6 in December 1991 from November's level of 107.5. Of the 21 indexes for major groups of products, eight increased while seven decreased and six remained unchanged. The main indexes contributing increases this month were fruit, vegetable, feed and miscellaneous food products (0.5%) and lumber, sawmill and other wood products (0.4%). An additional factor in December was the 1.0% increase of the U.S. dollar versus its Canadian counterpart and its upward effect on prices of exported goods denominated in U.S. currency. Mainly affected were the autos, trucks and other transport equipment index which increased 0.3% in the month. These increases were partially offset by price decreases for petroleum and coal products (-1.1%).

Since December 1990, the IPPI has decreased 3.1%, the lowest annual rate of change registered since the introduction, in 1956, of the complete set of price indexes for manufactured goods; this contrasts with the positive year-to-year rate shown in January 1991 (2.2%). The major contributors to the annual change were indexes for primary metal products (-8.2%), paper and paper products (-12.4%) and petroleum and coal products (-23.6%). The primary metals and the paper and paper products groups were also the main cause of the change in the year-to-year rate for first stage intermediate goods, which went from -2.5% in January 1991 to -12.1% in December. Of indexes that increased over the year, those which had the biggest impact on the overall change were autos, trucks and other transport equipment (2.2%), tobacco and tobacco products (10.6%) and printing and publishing (3.4%). Despite these increases, the year-to-year rate for finished goods has also declined, from 4.0% in January 1991 to 0.2% in December. This is the lowest year-to-year change for finished goods since July 1988. Excluding petroleum and coal products, the 12-month change was -1.5% in December.

The fruit, vegetable, feed and miscellaneous food products index increased by 0.5% in December due mainly to higher prices for wheat flour (4.0%), refined sugar (2.3%) and miscellaneous food products (0.5%). Over the last twelve months, the fruit, vegetable, feed and miscellaneous food products index has risen by 1.2% mainly as a result of an increase in prices for fruit and vegetable preparations (2.8%) and miscellaneous food products (1.8%).

The lumber, sawmill and other wood products index showed an increase of 0.4% in December due primarily to higher prices for softwood lumber and ties (1.1%). Over the last twelve months, increases for softwood lumber and ties products (5.5%) were mainly responsible for the 1.2% increase in the lumber, sawmill and other wood products index.

According to initial estimates, the petroleum and coal products index fell by 1.1% in December due to lower prices for gasoline and other petroleum products. On a year-to-year basis, the petroleum and coal products index has declined 23.6% mainly as a result of lower prices for gasoline and fuel oils.

After fourteen consecutive monthly declines, the paper and paper products index remained unchanged in December at 104.2. An increase in the pulp index (1.5%) was offset by a decrease in the newsprint and other paper stock index (-0.5%). Higher prices for pulp were experienced on both domestic and export markets. Over the last twelve months, the pulp index has fallen 29.8% while the newsprint and other paper stock group and the paper products group indexes were down 7.6% and 3.0% respectively.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986 = 100) se situait à 107.6 en décembre 1991 par rapport au niveau de 107.5 pour novembre 1991. Des 21 principaux groupes des produits, huit ont augmenté alors que sept ont diminué et six sont demeurés inchangés. Les hausses les plus importantes furent enregistrées dans les indices des fruits, légumes, aliments pour animaux et divers (0.5%) et des sciages, produits de scierie et divers (0.4%). Un facteur additionnel a été la hausse de 1.0% du dollar américain face au dollar canadien en décembre, et son effet à la hausse sur les prix à l'exportation, cotés en dollar américain, a principalement affecté l'indice des autos, camions et autre matériel de transport (0.3%). Ces augmentations ont été partiellement contrebalancées par des diminutions dans les prix des produits du pétrole et du charbon (-1.1%).

Depuis décembre 1990, l'IPPI a diminué de 3.1%, le plus bas taux de variation annuel enregistré depuis l'introduction, en 1956, de l'ensemble complet des indices de prix pour les produits manufacturés; un contraste avec le taux positif affiché en janvier 1991 (2.2%). Les principaux indices derrière la baisse annuelle ont été les produits métalliques primaires (-8.2%), le papier et produits connexes (-12.4%) et les produits du pétrole et du charbon (-23.6%). Les produits métalliques primaires et ceux du papier et produits connexes ont été aussi les principaux facteurs du changement important dans le taux annuel de variation pour les produits semi-finis de première transformation, qui est passé de -2.5% en janvier 1991 à -12.1% en décembre. Parmi les indices qui ont enregistré une augmentation annuelle, ceux qui ont eu un effet modérateur sur la variation annuelle ont été les autos, camions et autre matériel de transport (2.2%), le tabac et produits du tabac (10.6%) et l'impression et l'édition (3.4%). Malgré ces hausses, le taux de changement annuel pour les produits finis a aussi diminué, passant de 4.0% en janvier 1991 à 0.2% en décembre. Ceci est le plus bas taux de variation annuel enregistré pour les produits finis depuis juillet 1988. Sans les produits du pétrole et du charbon, la variation sur douze mois a été de -1.5% en décembre.

L'indice des fruits, légumes, aliments pour animaux et divers a affiché une hausse de 0.5% en décembre, en raison principalement d'une augmentation dans les prix de la farine de blé (4.0%), du sucre (2.3%) et des produits alimentaires divers (0.5%). Au cours des douze derniers mois, l'indice des fruits, légumes, aliments pour animaux et divers a augmenté de 1.2%, principalement à cause des hausses dans les prix des préparations à base de fruits et de légumes (2.8%) et des produits alimentaires divers (1.8%).

L'indice des sciages, produits de scierie et divers a connu une hausse de 0.4% en décembre 1991, en raison principalement de l'effet de la hausse de 1.1% affiché par les prix du bois de construction, de résineux. Au cours des douze derniers mois, l'augmentation dans les prix du bois de construction, de résineux (5.5%) a été le principal facteur du changement dans le taux annuel de variation pour l'indice des sciages, produits de scierie et divers (1.2%).

D'après les chiffres préliminaires, l'indice des produits du pétrole et du charbon a diminué de 1.1% en décembre, reflétant des prix plus bas pour l'essence et les autres produits du pétrole et du charbon. Au cours des douze derniers mois, l'indice du pétrole et du charbon a chuté de 23.6% en raison principalement d'une baisse dans les prix de l'essence et du mazout.

Faisant suite à quatorze mois de diminutions,l'indice des prix du papier et produits connexes est demeuré inchangé en décembre à 104.2. Une augmentation dans l'indice des pâtes de bois (1.5%) a été contrebalancée par une baisse dans l'indice du papier journal et autres pâtes travaillées (-0.5%). Des prix plus hauts ont été affichés tant sur le marché domestique que sur celui à l'exportation. Au cours des douze derniers mois, l'indice des pâtes de bois a chuté de 29.8% pendant que l'indice du groupe du papier journal et autres pâtes travaillées et celui des produits du papier étaient en baisse respectivement de 7.6% et 3.0%.

Highlights

Raw Materials Price Index

Preliminary estimates for the Raw Materials Price Index (RMPI, 1986 = 100) showed a 1.6% decrease to 101.3 in December. The contributors to this decline were the mineral fuels index which fell by 5.5% and the non-ferrous metals price index which was down 2.7%. However, the remaining five components of the RMPI rose in December, particulary the wood index (1.9%) and the vegetable products index (2.1). This was the first time since May 1990 that more components went up than went down. After several months of decline, the RMPI excluding mineral fuels rose 0.4% compared to November.

In December 1991, the RMPI was down 15.7% from December 1990. The decrease was due to declines in six of seven components of the total index. The main changes were a 31.0% drop in mineral fuel prices and a 16.1% decrease in the non-ferrous metals index. Excluding the mineral fuels component, the RMPI was down 5.6% in December 1991 compared to December 1990.

The mineral fuels price index fell by 5.5% in December as a result of lower prices for crude mineral oils (-6.0%). However, the price of natural gas was up in December, by 4.0%. The mineral fuels index was down 31.0% from December 1990, due primarily to a 32.6% drop in the prices of crude mineral oils.

The non-ferrous metals index was down 2.7% from the previous month. This decline was mainly due to the 7.8% drop in the prices of copper concentrates. Other changes, the 12.2% increase in prices of zinc concentrates and the 1.8% drop in the prices of aluminum materials offset each other. Over the past year, the non-ferrous metals index has dropped by 16.1%. The main contributions to this decline came from lower prices for aluminum materials (-29.7%), concentrates of copper (-13.8%) and radio-active concentrates (-35.2%).

The wood price index rose 1.9% in December. The prices of logs and bolts were up 2.9% but the prices of softwood pulpwood went down 0.2% and the prices of hardwood pulpwood fell by 0.4%. On a year-to-year basis, the wood price index was up 2.1%. All its four components were up also.

In December the vegetable products index was up 2.1% from November. This was mainly due a 7.8% increase in unrefined sugar and a 4.9% rise in grain prices. However, the overall increase was moderated by a 3.2% drop in raw tobacco prices. Over the previous twelve months, the vegetable products index fell 2.7% due primarily to drops in the prices of unrefined sugar (-16.1%) and oilseeds (-8.0%). A 7.5% increase in grain prices moderated the overall decline.

Faits saillants

Indices des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) était en baisse de 1.6% à 101.3 en décembre. Cette chute a été causée par la diminution de 5.5% de l'indice des prix des combustibles minéraux ainsi que par celle de 2.7% de l'indice des métaux non ferreux. Cependant, les cinq autres composantes de l'IPMB étaient en hausse en décembre dont les prix du bois (1.9%) et des produits végétaux (2.1%). C'est la première fois depuis mai 1990 qu'il y a plus d'indice qui soit en hausse qu'en baisse par rapport au mois précédent. D'autre part, après plusieurs mois de baisse, l'IPMB sans la composante des combustibles minéraux a augmenté de 0.4% par rapport au mois dernier.

En décembre 1991, l'IPMB était inférieur de 15.7% par rapport à la même période l'an dernier. Cette diminution a été le résultat de baisses dans six des sept composantes de l'indice total. Parmi celles-ci, notons la chute de 31.0% des prix des combustibles minéraux et celle de 16.1% de l'indice des métaux non ferreux. L'IPMB sans la composante des combustibles minéraux a diminué de 5.6% entre décembre 1990 et décembre 1991.

L'indice des prix des combustibles minéraux a diminué de 5.5% en décembre suite à la baisse de 6.0% des prix des huiles minérales brutes. Cependant, le prix du gaz naturel était en hausse de 4.0% ce mois-ci. Par rapport à l'an dernier, l'indice des combustibles minéraux a diminué de 31.0% surtout à cause de la chute de 32.6% des prix des huiles minérales brutes.

L'indice des métaux non ferreux a diminué de 2.7% par rapport au mois précédent. Cette chute a été surtout causée par la baisse de 7.8% des prix des concentrés de cuivre. D'autre part, l'augmentation de 12.2% des prix des concentrés de zinc fut presque entièrement neutralisée par la baisse de 1.8% des prix des matériaux d'aluminium. Au cours de la dernière année, l'indice des métaux non ferreux a diminué de 16.1%. Cette baisse fut le résultat de la chute de 29.7% des prix des matériaux d'aluminium, des concentrés de cuivre (-13.8%) et de concentrés radio-actifs (-35.2%).

L'indice des prix du bois a augmenté de 1.9% en décembre. Les prix des billes et billots ont monté de 2.9%, ceux du bois à pâte de résineux ont fléchi de 0.2% et ceux du bois à pâte de feuillu de 0.4%. Comparé à la même période l'an dernier, l'indice des prix du bois a augmenté de 2.1% reflétant des augmentations dans toutes les composantes de l'indice.

L'indice des substances végétales a enregistré en décembre une augmentation de 2.1% par rapport à novembre. Cette variation a été surtout causée par les hausses de 7.8% des indices du sucre non raffiné et de 4.9% des prix des céréales. Cependant, la baisse de 3.2% des prix du tabac en feuilles a modéré la hausse globale. Au cours des douze derniers mois, l'indice des substances végétales a diminué de 2.7% en raison principalement des baisses de 16.1% des indices du sucre non raffiné et des oléagineux (-8.0%). Ces baisses ont cependant été modérées par la hausse de 7.5% des prix des céréales.

TABLE 1. Summary of Recent Price Movements

TABLEAU 1. Sommaire des récents mouvements des prix

		Index Indices		Percentage change from Variation en pourcentage		
		December 91 Décembre 91	November 91(1) Novembre 91(1)	November 91 Novembre 91	September 91 Septembre 91	December 90 Décembre 90
2	**All commodities(2) – Total – Tous les produits(2)**	**107.6**	**107.5**	**0.1**	**0.0**	**-3.1**
	Meat, fish & dairy products – Viande, poisson & prod. laitier	108.3	108.4	-0.1	-0.8	-1.4
	Fruits, veg., feed, misc. food prod. – Fruits, lég., alim. anim. & divers	113.6	113.0	0.5	0.9	1.2
	Beverages – Boissons	120.6	120.6	0.0	-0.2	3.3
	Tobacco & tobacco products – Tabac & produits du tabac	146.7	146.5	0.1	2.7	10.6
	Rubber, leather, plastic fab. prod. – Prod. en caout., en cuir, mat. pla.	114.3	114.5	-0.2	-0.1	-1.6
	Textile products – Produits textiles	109.3	109.4	-0.1	-0.4	0.2
	Knitted products & clothing – Produits en tricot & vêtements	114.0	113.9	0.1	0.0	1.6
	Lumber, sawmill, other wood prod. – Sciages, prod. de scierie & divers	104.6	104.2	0.4	-0.1	1.2
	Furniture & fixtures – Meubles & articles d'ameublement	118.4	118.4	0.0	-0.1	1.2
	Paper & paper products – Papier & produits connexes	104.2	104.2	0.0	-1.8	-12.4
	Printing & publishing – Impression & édition	126.0	126.0	0.0	0.9	3.4
	Primary metal products – Produits métalliques primaires	101.3	101.4	-0.1	-1.1	-8.2
	Metal fabricated products – Semi-produits métalliques	112.6	112.5	0.1	0.2	0.4
	Machinery & equipment – Machines & matériel	115.4	115.4	0.0	-0.1	1.0
	Autos, trucks, other transp. eqp. – Voitures, camions & autres	100.5	100.2	0.3	1.8	2.2
	Elec. & communications prod. – Appareils élect. & de télécom.	110.2	110.0	0.2	0.2	-0.3
	Non metallic mineral products – Produits minéraux non métallique	110.8	110.8	0.0	0.2	-0.8
	Petroleum & coal products – Produits du pétrole & du charbon	92.1	93.1	-1.1	-1.1	-23.6
	Chemicals, chemical products – Produits chimiques	113.6	113.5	0.1	-0.1	-4.1
	Misc. manufactured products – Produits manufacturiers divers	111.2	111.3	-0.1	-0.3	1.4
4	**Intermediate goods – Produits semi-finis**	**105.9**	**105.9**	**0.0**	**-0.5**	**-5.1**
	First stage intermediate goods – Produits semi-finis de première étape	102.8	102.7	0.1	-1.4	-12.1
	Second stage intermediate goods – Produits semi-finis de deuxième étape	106.8	106.8	0.0	-0.2	-3.0
	All finished goods – Tous les produits finis	**110.1**	**110.0**	**0.1**	**0.6**	**0.2**
	Finished foods & feeds – Aliments de consommation et alim. pour anim.	114.9	114.9	0.0	0.0	1.1
	Capital equipment – Matériel capitalisé	109.1	109.0	0.1	0.9	1.9
	All other finished goods – Tous autres produits finis	108.1	108.1	0.0	0.7	-1.3
3	**All manufacturing industries(2) – Industries manufacturières(2): Gross weighted (80 SIC)(2) – Pondération brute (80 CTI)(2)**	**107.6**	**107.5**	**0.1**	**0.0**	**-3.1**
6	**Raw materials – Total – Ensemble des matières brutes**	**101.3**	**102.9**	**-1.6**	**-0.5**	**-15.7**
	Raw materials – Total – Excl. mineral fuels – Ensemble des matières sauf combustibles minéraux	**100.0**	**99.6**	**0.4**	**-1.4**	**-5.6**
	Vegetable products – Substances végétales	89.6	87.8	2.1	0.2	-2.7
	Animal & animal products – Animaux & substances animales	99.0	98.6	0.4	-2.0	-6.1
	Wood – Bois	124.2	121.9	1.9	0.9	2.1
	Ferrous material – Matières ferreuses	88.0	87.6	0.5	-1.1	-4.5
	Non ferrous metals – Métaux non ferreux	89.2	91.7	-2.7	-4.8	-16.1
	Non metallic minerals – Minéraux non métalliques	101.1	100.9	0.2	0.0	-3.3
	Mineral fuels – Combustibles minéraux	104.0	110.0	-5.5	1.4	-31.0

(1) Revised.
(1) Révisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations des produits

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

			Month - Mois												Annual average - Moyenne annuelle
			Jan. - Janv.	Feb. - Fév.	March - Mars	April - Avril	May - Mai	June - Juin	July - Juill.	Aug. - Août	Sept.	Oct.	Nov.	Déc.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix. bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{i}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$ signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggragations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de L'industrie, 1986 = 100: guide aux utilisateurs, $40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à a période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précémment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607, télécopieur (613)951-2848.

What happened to the cost of living last month?

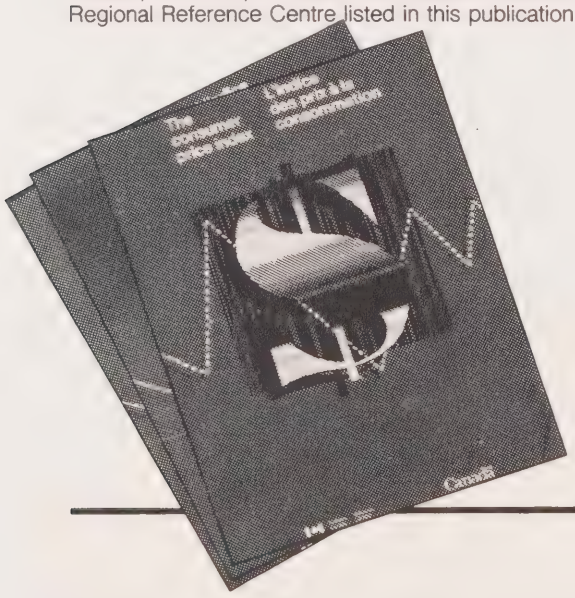
The Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- food
- clothing
- housing
- health and personal care
- recreation, reading and education
- tobacco products and alcoholic beverages



Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

Get the facts.

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for $93 in Canada, US$112 in the United States and US$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Qu'en était-il du coût de la vie le mois dernier ?

L'indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

Abonnez-vous !

L'indice des prix à la consommation (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 $ au Canada, 112 $ US aux États-Unis et 130 $ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

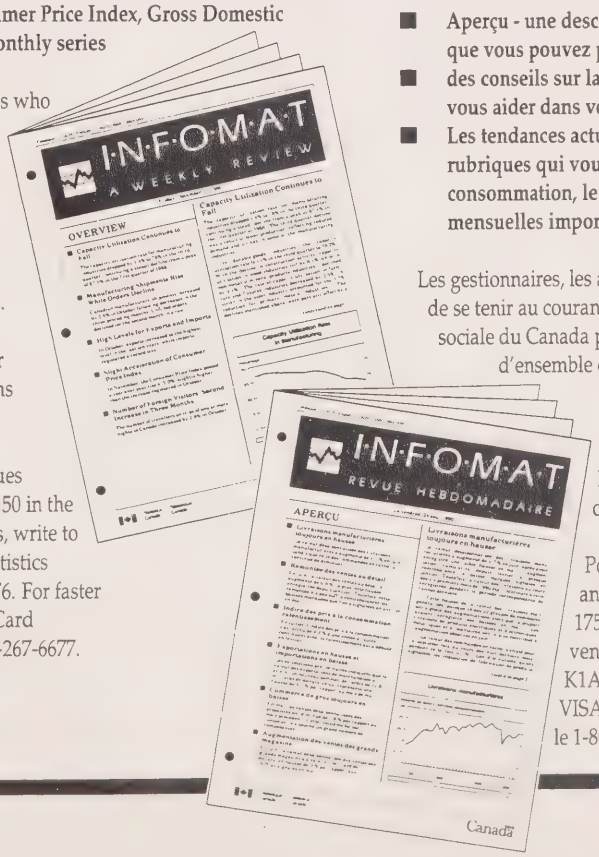
Don't start your week without it



Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.

In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for $125 in Canada, US$150 in the U.S. and US$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A OT6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

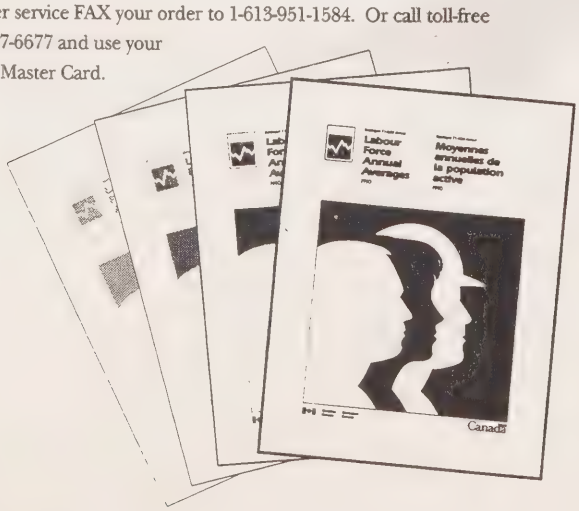
Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 $ au Canada, 150 $ US aux États-Unis et 175 $ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

To those of you who need in-depth information about the labour market ...

... Statistics Canada introduces ***Labour Force Annual Averages 1990*** — a brand-new reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force.*

The ***Labour Force Annual Averages 1990*** covers:



- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by province;
- hours worked by industry and occupation, by sex, age and province;
- and more.

Labour Force Annual Averages 1990. Part and parcel of Statistics Canada's customer-driven approach to business information.

Labour Force Annual Averages 1990 (catalogue number 71-220) is available for $39 in Canada, US$47 in the United States and US$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)
